SUMMARY

Full-Stack Software Engineer with 5+ years building and scaling web applications and backend services in the JavaScript/TypeScript ecosystem. Strong in NestJS, Node.js, and React with deep PostgreSQL, data engineering, and AWS experience; proven at leading backend teams and migrating production databases.

TECHNICAL SKILLS

Languages	: JavaScript, TypeScript, SQL, PHP
Backend	: NestJS, Node.js, Express.js, REST APIs, GraphQL, WebSockets, Microservices, RabbitMQ, Kafka, Redis, Prisma, TypeORM, Sequelize, Mongoose, Swagger, Keycloak
Frontend	: React, Next.js, Redux, React Router
Databases	: PostgreSQL, MySQL, MongoDB, SQL Server
Cloud & DevOps	: AWS (EC2, S3, Elastic Beanstalk, Lambda, CloudWatch, ElastiCache, RDS, CloudFront), Azure (DevOps, Functions, Blob Storage), Docker
Data & BI	: Snowflake, Holistics, SQL Query Optimization
Tools	: Git, Postman, DBeaver, Sentry, Firebase, VS Code

EXPERIENCE

Senior Software Engineer

Koderlabs

Aug 2023 – Present

Onsite – Karachi, Pakistan

- Design and maintain backend services and REST APIs in **NestJS** and **TypeScript** with **Prisma** over **PostgreSQL** for Spruce, a property-management and home-services platform.
- Refactored a high-volume booking-generation process to handle 5,000-record runs in 500-row transactional chunks, removing an $O(n^2)$ lookup and reducing database connection-pool pressure.
- Recovered and migrated production **PostgreSQL** databases from custom-format binary dumps using **pg_restore**, including per-table recovery of a partially truncated archive spanning 30+ tables.
- Ported 15+ analytics reports from **Snowflake** to **PostgreSQL** in **Holistics** BI, resolving join fan-out with **DISTINCT ON** and pre-aggregated CTEs for accurate metrics.
- Deployed and operated applications on **AWS** (Elastic Beanstalk, Lambda, RDS, S3, CloudWatch), upgrading Lambda Node.js runtimes and defining an RDS snapshot and backup strategy.
- Led the backend team, managing tasks, reviewing code, and enforcing development best practices; implemented real-time features using **socket events**.

Software Engineer

Concave Ventures

Mar 2021 – Aug 2023

Onsite – Karachi, Pakistan

- Built and shipped full-stack web applications across agritech, e-commerce, and CRM domains on the **MERN** and **.NET** stacks, owning back-end APIs, database design, and front-end UI.
- Designed REST APIs with **Keycloak**/JWT auth and **Swagger** docs; built reporting with **Mongoose** pipelines and SQL stored procedures; integrated payment/courier services and serverless jobs (**Azure** Functions, **Node-cron**).

PROJECTS

Spruce

NestJS, Prisma, PostgreSQL, AWS, Holistics, Snowflake

- Property-management and home-services platform. Integrated **Braze** for emails and notifications, **AWS** trigger functions for image-thumbnail generation, and cron jobs for payment settlements before booking dates.

RxPak

NestJS, Prisma, PostgreSQL, AWS

- E-commerce platform for medical products. Single-handedly built the backend with **NestJS**, **Prisma**, and **PostgreSQL**; integrated **PowerTranz** payment processing and **AWS** serverless functions for delivery-status updates and low-stock refill reminders.

Kisaan Madadgar

TypeScript, NestJS, React, MongoDB, Azure

- Agritech platform helping farmers make informed crop and livestock decisions. Built the back-end and database with **NestJS** and **Mongoose**; implemented **Keycloak** authentication, Mongoose aggregation pipelines with **Swagger** docs, **Node-cron** with **Firebase** notifications, and **Azure** Functions for serverless tasks.

EDUCATION

Master of Science in Data Science

NED University, Karachi

In Progress

CGPA: 3.34

Bachelor of Science in Computer Science

Iqra University, Karachi

2017 – 2021

CGPA: 3.55

ACHIEVEMENTS

- Certificate of Recognition: **Koderlabs** (2024) and **Concave Ventures** (2022).
